It Takes Two To Talk®

### About the It Takes Two to Talk® Workshop

In this experiential three-day Hanen Certification Workshop, speech-language pathologists/therapists learn about the Hanen approach to early language intervention, which **empowers parents of children with language delays to become their child's primary language facilitator**. They also receive training in how to lead the *It Takes Two to Talk* Program, in which parents learn to apply responsive strategies to everyday interactions with their child, making intervention an ongoing process.

The *It Takes Two to Talk* workshop:

- Is Hanen's initial, foundational workshop and is for speech-language pathologists/therapists (SLP/Ts) only  
If you are not a speech-language pathologist/therapist, [click here](#).
- Provides intensive, small-group training to SLP/Ts who work with preschoolers (0-5) with language delays and their families
- Addresses application of the Hanen approach within everyday clinical practice, as well as within an *It Takes Two to Talk* Program
- Covers adult learning principles and their application to teaching parents/caregivers, using the Hanen teaching model
- Is a prerequisite for attendance at advanced Hanen workshops
